

GOVERNMENT OF ANDHRA PRADESH
HEALTH MEDICAL & FAMILY WELFARE DEPARTMENT

Memo No. /COVID-19/2020

Date: 20.4.2020

COVID ORDER - 33

Sub: COVID-19 –Addl. Instructions - Defining “Red, Orange and Green Mandals/ zones” –Reg

Ref: 1. MoHFW DO letter No:Z-21020/16/2020-PH dated 15th April 2020
2. MHA, GOI Letter No: 40-3/2020-DM-I(A), dt. 15.4.2020.
3. G.O. Rt.No.239, HM&FW(B2) Dept. dt. 16.4.2020.
4. COVID Order 28 dated 18th April 2020
5. COVID Order 20 dated 9th April 2020

@@@

As per the orders issued vide order at reference 4 above, the affected areas have been designated as the Red Mandals/ zones in which stricter containment measures will be taken up. Further it has also been mentioned that the mandals where no new cases are found in last 14 days under reference are also designated as Orange Mandals in which containment measures will continue till they turn green in order to ensure no new cases come up lest the Mandal becomes Red. As per the letter in reference 1 above, 11 districts out of the 13 districts in the state of Andhra Pradesh have been categorized as “hotspot districts with large outbreaks”.

In partial modification of the orders and in further clarification of the orders issued, to ensure limited operations in the state outside the containment clusters the following instructions are issued:

Containment Cluster

Containment cluster has been defined in COVID Order 20 under reference 5 above. The same is clarified again. A cluster is defined as “ an unusual aggregation of health events that are grouped together in time and space and that are reported to an health agency (Source: CDC). The Cluster Containment Strategy would be to contain the disease within a defined geographic area by early detection of cases, breaking the chain of transmission and thus preventing its spread to new areas.

Determining Containment Cluster and Buffer Zones

A defined geographical area is mapped for the case/cluster of cases and their contacts as found and cluster containment strategy is put in place to break the chain of transmission. The area of operations for containment extend up to 3 kms of epicentre with 7 kms radius of buffer zone in rural areas and 5 kms radius of Buffer zone in the urban areas. A buffer Zone is an area around the containment zone where new cases are most likely to appear. There would not be any perimeter control in the buffer zone but surveillance for ILI cases will be on. The district administration shall appropriately define the containment cluster to enforce perimeter control and other activities effectively as defined in order under Reference 5 above. A total of 166 Containment clusters are identified across the state till date which will increase as cases are identified in new areas. (Annexure-1)

1. Red Zone/Red Mandals

These are hot spots where the containment measures have to strictly enforced with effective contact tracing. They are mandals where:

1. More than 4 active cases exist in the Mandal (or)
2. More than 50 contacts to the positive case/s exist
3. Multiple containment clusters exist in the Mandal signaling a large outbreak (or)
4. Local transmission has started in the community i.e.
 - a. Positive case/s are registered in persons who have no known history of travel from an area reporting cases (or) contact from such persons who have travel history.
 - b. No known contact with a positive case exists, but the person is tested positive.

All such affected mandals, both urban and rural are categorized as a Red Mandal. Stricter containment measures shall be enforced in these mandals. No activity whatsoever, will be allowed within containment clusters and strict perimeter control shall be enforced. Only essential activities which are were previously permitted in the Mandal shall continue to function without disturbing the perimeter controls for containment. No new activities shall be permitted.

As on 19th April 2020, **51 Mandals mentioned at Annexure-2 fall in this category.**

2. Orange Zone/Orange Mandal

These are mandals which are having positive cases less than 4 signaling only a limited outbreak with only one containment cluster existing in the entire Mandal. No activities are permitted within the containment cluster and strict perimeter controls shall be enforced. In addition to agriculture activities permitted within the Mandal, limited industrial activity outside the containment cluster shall be allowed subject to the SOP issued by the Industries and Commerce Department. Labour shall be locally sourced and shall not be allowed to travel long distances.

No movement crossing the containment cluster shall be allowed whatsoever. If new cases are registered in the orange zone in the category mentioned above for red zone, the same restrictions of red zone will apply.

As on 19th April 2020, **47 Mandals mentioned at Annexure-3 fall in this category.**

3. Green Mandal/ Zone

The Mandals where the infection has not affected at all and limited activities as per the GO in reference 3 are allowed. The prohibited activities will continue to be prohibited in the Green Zone as well.

The summary of the Prohibited and limited operations are given at **Annexure 4** in line with the MHA order at reference 2 above.

When the containment operations can be scaled down

The operations will be scaled down if no laboratory confirmed COVID 19 positive case is reported from the containment and buffer zones for at least 4 weeks after the last confirmed case has been isolated and all his contacts are followed up for 28 days.

When the Containment operations are deemed over

The containment operations shall be deemed to be over 28 days from the discharge of the last confirmed case from the designated health facility. All District Collectors as incident commanders to take steps accordingly.

Special Chief Secretary
HM&FW Dept.
